About me

I am an undergraduate student with aspiration to work in a field that produces challenge and scope to learn. Am keen on learning new stuff that has practical implementation. Problem solving is one of my favorite places to go in leisure. Like to read and travel. I can build a friendly environment with almost anyone who is also willing. I am willing to work hard as long as there is challenge. Team playing is one of my assets.

Skills

(*)[The skill scale is from 0 (Fundamental Awareness) to 6 (Expert).]

Interests

Problem solving, building stuff with code , reading , traveling.

Education

- Since 2014 Undergraduate student in Computer Science and Engineering
Bangladesh University of Engineering and Technology
